

WIREKNITZ®
THE INNOVATIVE COPPER WIRE KNIT®

THE INNOVATIVE COPPER WIRE KNIT®

Wrist Mandrel for shaping cuffs

[See Project Idea #108](#)

Cooking tongs for pulling one WireKnitZ® tube through another creating tubular layers

Hand Drill for twisting long lengths of the #1000 and #2000 Series

Tube Wringer for crimping or corrugating WireKnitZ®

Awl for making knots & dimples

Clamp to secure one end while twisting the other by hand or with the hand drill

Tape Measure

Scissors

Toothbrush to realign knit if WireKnitZ® becomes crimped at edges.

Mannequin or bust for ease in working. Use straight pins to help position layers of WireKnitZ®

#1000 Series

5/8 inch wide
38 gauge wire
TIGHT Knit

More Handy Tips

Use jewelers epoxy to glue twisted ends into jewelry clasps, or feed wire through and around twisted ends and into cone ends to finish with a wrapped wire loop. Thread a needle with braided beading thread and stitch WireKnitZ® in place, or to secure beads and other adornments.

Straight pins are handy for securing WireKnitZ® while developing your design.

Conical objects for shaping WireKnitZ®.

Collect WireKnitZ® cuttings and use in place of glitter, capture in resin for making beads, pendants, etc.

There are so many uses for WireKnitZ® - personal adornments, home décor, quilting, scrapbooking, etc.

Make beads by gently crushing and rolling scraps of #4000 Coarse Knit Series between your hands.

Make necklaces by gently crushing and rolling length of #1000 and #2000 Tight Knit or #4000 Coarse Knit Series between your hands. To narrow rolled necklaces, gently stretch while rolling.

WireKnitZ® is extremely flexible and forgiving.

If you bend an edge, or spread the knitted wire more than intended, use a soft toothbrush (flat bristle is preferred) on a flat surface, hold down one side with one hand, gently brush with the other.

Alternatively, try rubbing in a circular motion between your thumb and finger to reposition the wire. If all else fails, save the damaged piece for future projects. Really, nothing goes to waste!

#2000 Series

3.34 inches wide
38 gauge wire
TIGHT Knit

#3000 Series

3.34 inches wide
32 gauge wire
TIGHT Knit

#4000 Series

3.34 inches wide
32 gauge wire
COARSE Knit

#5000 Series

3.34 inches wide
32 gauge wire
MEDIUM Knit

Cone Ends and wrapped wire loop to finish. Voila!

The looser the knit, the greater the stretch!
