

2 – Bracelets make 1 – Necklace!

Project makes 2 Bracelets, 1 Necklace, or add more to make a belt!

Create two “easy-to-make” Convertible bracelets by simply wrapping desired color WireKnitZ® around a 1/4” dowel, and gluing magnetic clasps at both ends.

Bracelet Instructions

1. Lay one 9-inch length of WireKnitZ® on a flat surface. Place dowel directly on top of mesh lengthwise and approximately 1/2-inch from long edge.

2. Begin in the center by rolling the mesh on the dowel then working outward toward both ends. Continue until the entire length of wire mesh coils around the dowel.

3. Remove dowel. With both hands, roll the coiled mesh between both palms to compress the coil. Apply equal pressure while rolling to achieve uniform thickness.

4. To size bracelet, measure distance around wrist with tape measure and size to desired fit. Subtract 1/2-inch from measurement to accommodate MC2 clasp. Trim both ends flat to measure creating a clean and uniform end to fit into open end of clasp.

5. To secure ends of coiled mesh, simply stitch each end with FireLine thread, crisscrossing the thread through all layers of the coiled mesh. Knot the thread and cut thread tails close to knot, and away from mesh.

6. To ensure a proper fit, mold and shape one end of mesh to fit into open end of clasp before gluing. When coiled end fits snugly and properly in clasp opening, remove coiled end from the clasp.

“ Convertibles ” Bracelets to Choker or Belt
Designed by Norma Melton

Materials & Tools

To make a choker necklace using two bracelets you will need the following:

- 2 – 9” lengths of 3000 or 5000 Series WireKnitZ®***
- 2 – Magnetic Clasps available in Antique Brass, Antique Copper, or Antique Silver***
- 24” FireLine Braided Bead Thread 4 lb.***
- Loctite® Super Glue Ultra Gel***
- ¼-inch diameter dowel
- Sewing needle
- Ruler
- Sewing Tape Measure

***Find these items at www.WireKnitZ.com

*** **VERIFY CLASPS ARE MAGNETIZED THE SAME FOR MULTIPLE CONNECTIONS—OUR CLASPS ARE VERIFIED.**

7. Squeeze Loctite Glue into clasp opening and *fill slightly less than half of space to prevent overflow*. Insert mesh end into the clasp and hold firmly to ensure the glue and mesh bond. **When using any glue product, carefully read manufacturer’s directions and warnings, prior to use. Allow glue to cure according to manufacturer’s direction.**

At opposite end of mesh, repeat steps 6 & 7.

Choker:

To make a choker style necklace, simply repeat steps 1-7 to make a second bracelet. Clasp both completed bracelets together to form a custom tailored choker style necklace!

Belt:

To make a belt, assemble several bracelets, in various lengths and colors. Rearrange to create a new look!
